Infertility Testing | Edmond Diagnostic Radiology

www.edmondradiology.com › Services › Infertility Testing- HSG, Ultrasound ▼

Hysterosalpingogram (HSG)- **Infertility testing**: Hysterosalpingography is typically used to examine women who have difficulty becoming pregnant or who have repeated miscarriages. Contrast (x-ray dye) is injected through a catheter into the uterine cavity to assess the interior of the uterus and the patency of the fallopian

Women's Health Center of Oklahoma | Infertility

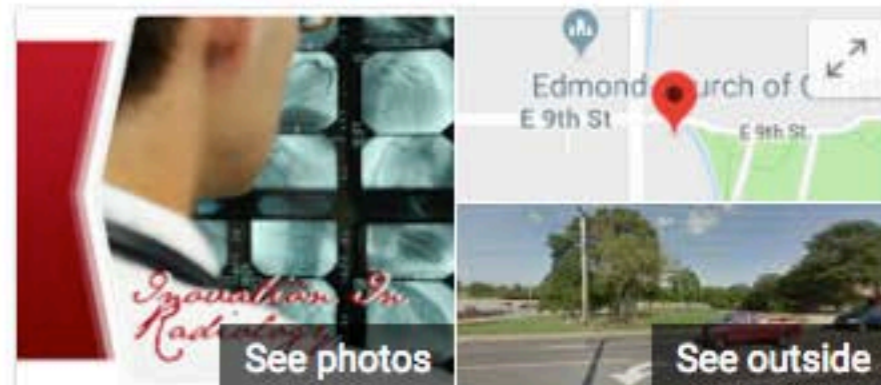

www.womenshealthok.com/infertility/ ▼

So, instead of charging for **test after test**, Dr. Martin charges a one-time, up front fee to manage and evaluate your **infertility testing**. You will know at the start of your treatment what the charges are going to be, without worrying about a never-ending financial drain. The cost for participating is a fraction of the cost normally paid ...

Infertility Tests - Health Library - Stonebridge OBGYN - Edmond, OK ...

www.stonebridgeobgyn.com/health-library/hw-view.php?DOCHWID=aa39523 ▼

Before you have **infertility tests**, try **fertility** awareness methods to find the best time to become pregnant. A woman is most fertile during ovulation and 1 to 2 days before ovulation. Some couples find that they have been missing the most fertile days when trying to become pregnant. A woman should keep a record of her
